

For Immediate Release

Cordless Renovations, LLC Acquires RCS

Cedar Rapids, Iowa, September 17th, 2010—In a two part deal, four train enthusiasts (known as “The Group”) acquired exclusive rights (The Sale & Distribution of RCS) from Tony Walsham, owner of Remote Control Systems (RCS-Beltrol) of Victoria, Australia to sell, distribute and manufacture the Australian made Elite Series of the RCS product line along with the Elsema radio based hardware. Today, an agreement was signed to sell those rights from (“The Group”) to (in no specific terms) Remote Control Solutions, of Cedar Rapids, Iowa.

The well-known (RCS) name Remote Control Systems and product lines sold by Dave Goodson (NWRCS) and Don Sweet (RCS of NE) will be licensed and sold under the RCS name by Remote Control Solutions of North American.

The new RCS “Elite Series” will expand its product line and offer a new design from the existing Elsema radio based hand controllers that will give you a broader frequency range with more control options, along with a new line of DC / DCC decoders, sandwich boards (that will dissipate heat) and an (optional) basic sound file (diesel or steam) that can be downloaded into the new decoders.

During this transition train enthusiasts can continue to order the RCS product line and have it installed directly from Dave Goodson at NWRCS via: <http://dnkgoods.home.mindspring.com> or Don Sweet at RCS of NE via: <http://www.remotecontrolthrottles.com>. Soon all of our combined efforts and new product line will be available to purchase and have installed through our new website at: www.remotecontrolsolutions.net.

“This is a win...win acquisition for all of thus,” say’s Rick Isard, owner of Cordless Renovations, LLC. “With two of the best train enthusiasts/promoters (Dave Goodson & Don Sweet) leading our design team, we are sure to make a hole-in-one,” say’s Isard.

The RCS product line is now owned, operated and manufactured here in the United States by Remote Control Solutions, a subsidiary company of Cordless Renovations, LLC.
